

DELMHORST MOISTURE DETECTION

Reliable information for better drying

Accurate moisture detection instruments help you make informed decisions about the restorative drying process. In fact, knowing exactly where the moisture is and how much is critical for determining which techniques, equipment and procedures will be most effective. Dri-Eaz is proud to partner with GE Protimeter and Delmhorst Instrument Co. to provide the rugged, restoration-ready instruments you need to assess moisture content quickly and precisely.

PROUDLY
BUILT IN USA 

All Delmhorst meters feature:

- » Rugged construction that ensures years of reliable use
- » Sturdy shock-resistant plastic carrying case
- » 9V battery
- » 1 year no-hassle warranty
- » Plus, Delmhorst's team of knowledgeable, accessible technicians are standing by, ready to offer technical assistance. And if service is ever needed, Delmhorst offers quick turnaround to get you back to work quickly.

DELMHORST
INSTRUMENT CO.
WHEN ACCURACY IS THE POINT.™

1 QUICKNAV

Developed exclusively for Dri-Eaz, the fast-acclimating easy-to-use QuickNav incorporates a pin mode, a scan mode, and a thermo-hygrometer in a single handheld unit.

Instantly calculates dewpoint, grains per pound, and vapor pressure. Package includes the QuickNav meter, carrying case, 26-ES hammer electrode, 21-E insulation electrode, 2-E short pin electrode, and the exclusive 2-E/SPLIT electrode with alligator clips for checking under cabinets and other hard to reach areas.

- » Thermo-hygrometer measures RH and temperature; calculates dew point, GPP, and vapor pressure
- » Backlit display, adjustable alarm, reading hold feature
- » Correction scales include wood and drywall

ITEM #F471

2 BD-2100

Versatility in a compact package

Equipped with pin-type sensors, the BD-2100 can be used to measure moisture in wood, drywall and non-wood materials.

- » Includes drywall percentage moisture content scale – an exclusive Delmhorst feature.
- » Pin-type meter for wood, drywall and non-wood reference

ITEM #F463

3 HT-4000

Fast and accurate readings for the restoration professional

The HT-4000 is Delmhorst's premier thermo-hygrometer – perfect for restoration contractors who need a fast, accurate tool for locating and assessing moisture. Use with a moisture meter during the drying process and sign off the job with confidence. Detachable RH sensor allows for concrete testing.

- » Latest thermo-hygrometer with increased speed and accuracy
- » Removable hygrometer probe & 30% larger display
- » Instantly calculates dew point, grains per pound and vapor pressure
- » ASTM F2170 compliant

ITEM #F472

4 TECHCHECK PLUS PACKAGE

Versatile dual-mode meter

TechCheck Plus provides handy dual-mode moisture measurements at an economical price. Includes 21-E insulation electrode, extra contact pins for the meter, and carrying case.

- » Versatile dual-mode instrument
- » Use pins to probe up to 5/16 in. deep or scan up to 3/4 in. deep
- » Use the 3/4 in. 21-E to probe insulation or other soft materials
- » Top mounted accessory port for any Delmhorst accessory electrode.

ITEM #F465

5 HT-3000

The HT-3000 accurately measures humidity and temperature and instantly calculates grains per pound and dewpoint.

- » Measures humidity and temperature
- » Quickly calculates grains per pound and dewpoint

ITEM #F464

6 NAVIGATOR PRO RESTORATION PACKAGE (F462)

The complete moisture measurement kit

The Restoration Package includes everything the professional restorer needs to detect, evaluate and monitor moisture. Kit includes the Navigator Pro meter, three types of electrodes, Delmhorst's PC/KIT software application program, connecting cable and the carrying case – perfect for the restoration contractor.

- » Meter features pin and pinless modes
- » Built-in correction scales for drywall, concrete, and common wood species
- » Thermo-hygrometer and data log memory functions

ITEM #F462

Dri-Eaz also has available Delmhorst hammer probes and baseboard probes as well as a full array of replacement pins, sensors and fittings.
